

## Project Design Phase-I Solution Architecture

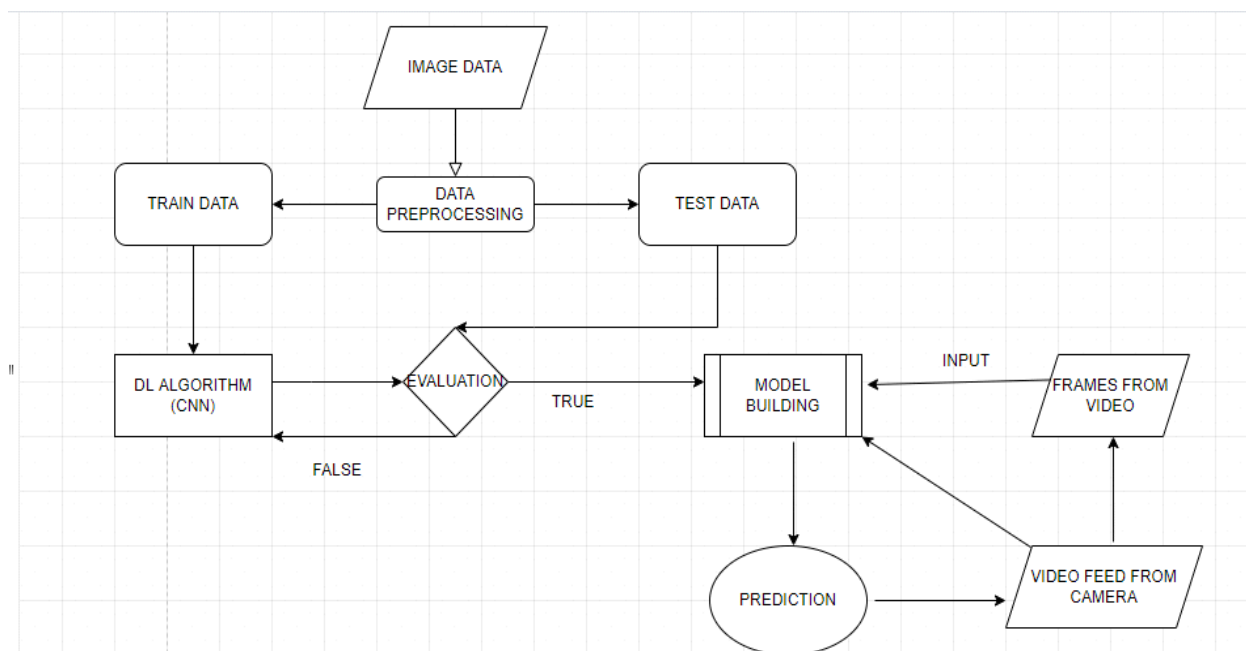

Date	12 OCTOBER 2022
Team ID	PNT2022TMID47032
Project Name	Natural disasters intensity analysis and classification using artificial intelligence
Maximum Marks	4 Marks

### Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

### Example - Solution Architecture Diagram:

*Figure 1: Architecture and data flow of the voice patient diary sample application*
